

Editorial Message

Records of Natural Products, which is one of the leading journals of the ACG Publications, entered into the scientific world with its first issue in 2007. The basic aim of the ACG Publications is to contribute to the circulation of the research findings to the scientific community through free online journals. *Records of Natural Products* welcomes articles on structural elucidation, synthesis and biosynthesis of naturally occurring compounds, biological activities of medicinal plant extracts and natural products, essential oils of aromatic plants, and plant chemotaxonomy.

We intend to place this journal at the forefront in recording significant researches on medicinal plants and natural products. During the three year period, with the contributions of the authors worldwide, *Records of Natural Products* has been involved in the databases such as Chemical Abstracts Service, CAB Abstracts, EMBASE, EMBiology and SCOPUS. In the meantime, it has also become a part of Directory of Open Access Journals. We thank all the authors who contributed papers for the issues in this period.

Records of Natural Products thanks the members of the Editorial Board for their kind contribution in this period. We are also very grateful to all the following reviewers for dealing with the manuscripts quickly and diligently:

Editorial Board of *Records of Natural Products*
