### Synthesis and antibacterial activity studies of 6-methoxyquinazoline-triazole hybrid derivatives

Venkataramireddy Veeramreddy<sup>1</sup>, Tejeswararao Allaka<sup>1</sup>,  
Jayashree Anireddy<sup>1,1</sup> and Ravi Varala<sup>2,\*</sup>

<sup>1</sup>*Centre for Chemical Sciences and Technology, IST, Jawaharlal Nehru Technological  
University Hyderabad, Kukatpally, Hyderabad-500085, India*

<sup>2</sup>*Department of Chemistry, Rajiv Gandhi University of Knowledge Technologies (AP-IIIT  
Basara), Adilabad-504107, Telengana State, India*

*# Present address: Polymer department, Institute de Fisica de Sao Carlos, University of Sao  
Paulo, P.O. Box: 369/13560-970, Brazil*

#### Antibacterial Activity

Medium: The antibiotic medium No.3 (Assay broth) was used as the Culture broth.

Ingredients	g/l
Beef extract	1.5
Yeast extract	1.5
Peptone	4.0
Dextrose	1.0
Sodium chloride	3.5
Di potassium phosphate	3.6
Mono potassium phosphate	1.2
Agar (1.5%)	15.0
